I enjoy listening to the variety of programs that XM Radio offers. It makes my trips across country a lot easier. Especially in the winter time it is nice to know that I can go to a channel and find out what the weather conditions are to the city or area where I am going. I don't always have the weather channel on tv available to me. If I know what weather or travel conditions are I can plan my trips accordingly and allow for the extra time that might be needed. It that way it helps keep me driving safer. I already pay for this service so NAB shouldn't tell me what I can or cannot listen to. I respectfully urge the FCC to reject the NAB petition 04-160. I
